

# Ethical AI Validator - Compliance Report

## Report Information

Generated: 2025-08-11 10:29:38  
Report ID: 20250811\_102938

## Model Information

model\_name: Logistic Regression  
config\_name: balanced  
version: 1.3

## Training Scenario and Hyperparameters

Scenario: LR-balanced

Hyperparameter	Value
C	1.0
class_weight	None
dual	False
fit_intercept	True
intercept_scaling	1
l1_ratio	None
max_iter	1000
multi_class	deprecated
n_jobs	None
penalty	l2
random_state	42
solver	lbfgs
tol	0.0001
verbose	0
warm_start	False

Audit Criteria

bias_threshold	0.3
fairness_threshold	0.7

Bias Analysis Results

Protected Attribute	Group	Bias Score
gender	female	0.198
gender	male	0.256
age_group	18-25	0.198
age_group	26-35	0.198
age_group	36-50	0.551
age_group	50+	0.138
education	bachelor	0.194
education	high_school	0.562
education	master	0.198
education	phd	0.198

Fairness Assessment Results

Protected Attribute	Fairness Score
gender	0.772
age_group	0.713
education	0.740

Hyperparameter Impact Analysis

Parameter	Value	Risk	Rationale
class_weight	None	LOW	No class weighting can under-serve minority groups if data is imbalanced.

Likely Contributing Factors

- 1. Low fairness score observed for 'age\_group' (score=0.713).
- 2. Highest bias in education -> high\_school (bias\_score=0.562).
- 3. Suspected hyperparameters: class\_weight=None (LOW) - No class weighting can under-serve minority groups if data is imbalanced.

Overall Compliance Summary

Overall Status	PARTIALLY COMPLIANT
Bias Issues	Yes
Fairness Issues	No
Total Issues	1
Summary	Minor issues detected. Some compliance requirements need attention.

GDPR Compliance Assessment

Requirement	Status	Notes
Data Minimization	Compliant	Audit completed successfully
Purpose Limitation	Compliant	Audit completed successfully
Transparency	Non-Compliant	Bias detected - transparency compromised
Accountability	Compliant	Audit completed successfully
Right to Explanation	Non-Compliant	Bias/fairness issues affect explainability

AI Act Compliance Assessment

Requirement	Status	Notes
Risk Assessment	Non-Compliant	Bias/fairness risks identified
Transparency Requirements	Non-Compliant	Bias affects transparency
Human Oversight	Non-Compliant	Bias/fairness issues require oversight
Accuracy Requirements	Compliant	Audit completed successfully
Documentation	Non-Compliant	Bias/fairness issues need documentation

## Recommendations

- 1: HIGH PRIORITY: Apply post-processing bias correction
- 2: Implement equalized odds post-processing
- 3: Implement comprehensive bias monitoring in production
- 4: Document all mitigation strategies implemented
- 5: Establish regular bias monitoring procedures
- 6: Provide model explanations for affected groups
- 7: Consider human oversight for high-stakes decisions
