## **Audit Criteria**

bias_threshold	0.3
fairness_threshold	0.7

# **Bias Analysis Results**

Protected Attribute	Group	Bias Score
gender	female	0.198

gender	male	0.256
age_group	18-25	0.198
age_group	26-35	0.198
age_group	36-50	0.551
age_group	50+	0.138
education	bachelor	0.194
education	high_school	0.562
education	master	0.198
education	phd	0.198

#### **Fairness Assessment Results**

Protected Attribute	Fairness Score
gender	0.772
age_group	0.713
education	0.740

## **Hyperparameter Impact Analysis**

Parameter	Value	Risk	Rationale
class_weight	None	LOW	No class weighting can under-serve minority groups if data is imbalanced.

## **Likely Contributing Factors**

- 1. Low fairness score observed for 'age\_group' (score=0.713).
- 2. Highest bias in education -> high\_school (bias\_score=0.562).
- 3. Suspected hyperparameters: class\_weight=None (LOW) No class weighting can under-serve minority groups if data is imbalanced.

## **Overall Compliance Summary**

Overall Status	PARTIALLY COMPLIANT
Bias Issues	Yes

Fairness Issues	No
Total Issues	1
Summary	Minor issues detected. Some compliance requirements need attention.

### **GDPR Compliance Assessment**

Requirement	Status	Notes
Data Minimization	Compliant	Audit completed successfully
Purpose Limitation	Compliant	Audit completed successfully
Transparency	Non-Compliant	Bias detected - transparency compromised
Accountability	Compliant	Audit completed successfully
Right to Explanation	Non-Compliant	Bias/fairness issues affect explainability

## **Al Act Compliance Assessment**

Requirement	Status	Notes
Risk Assessment	Non-Compliant	Bias/fairness risks identified
Transparency Requirements	Non-Compliant	Bias affects transparency
Human Oversight	Non-Compliant	Bias/fairness issues require oversight
Accuracy Requirements	Compliant	Audit completed successfully
Documentation	Non-Compliant	Bias/fairness issues need documentation

### **Recommendations**

- 1: HIGH PRIORITY: Apply post-processing bias correction
- 2: Implement equalized odds post-processing
- 3: Implement comprehensive bias monitoring in production
- 4: Document all mitigation strategies implemented
- 5: Establish regular bias monitoring procedures
- 6: Provide model explanations for affected groups
- 7: Consider human oversight for high-stakes decisions
